

PORTABLE CONNECTION CABLE

MSO 90°C

Rated voltage 300/300 V

CONSTRUCTION

Standard	SFS 5525 is applied
Conductor	Annealed copper wire, stranded, flexible
Insulation	Heat-resistant PVC
Cabling	Parallel conductors
Sheath	Heat- resistant PVC, flat form
Sheat marking	The sheat is marked V2, which indicate a operating temperature of 90 °C
Application	In domestics and offices as connection cable in light portable devices. Not suitable for outdoor use and use in cooking- and heating devices. If the cable is exposed to continual bending and/or winding, round cable is recommended.
Operating temperature	max. +90 °C
Handling temperature	min. -15 °C
Packing	bobbin mk4

Product number	Number of cores and nominal cross-section of conductor mm ²	Outer diameter of cable width x height mm x mm	Max. resistance of conductor at +20°C Ω/km	Total weight kg / km	Standard packing m
